MAJOR RESEARCH INTERESTS

As an addiction psychiatrist, I have extensive experience treating patients with addictive disorders. My research interests closely align with my clinical work. My main objective is to develop more efficacious treatments for substance use disorders. I have focused on two main approaches: 1) the use of treatments to enhance cognitive control, and 2) the development of clinical models of care that deliver evidence-based treatment within the practical realities of the current healthcare landscape.

RESEARCH SUPPORT

SUPPORT for ME: SUD Statewide Learning Collaborative

CMS/HHS - CMS-2C2-19-001

\$2,144,225, 01/22 – 12/24, Subcontractor (0.02 FTE)

The key goals of the grant are to enhance Maine's response to the opioid crisis through increased access to vital services for substance use disorder, and at the same time contribute to its comprehensive rural health transformation efforts.

Hospital Utilization for Opioid Overdose: A Community Engaged Multidisciplinary Approach to Measure the Impact of Policy Change and Inform Interventions

NNE-CTR - NIGMS U54GM115516

\$339,000, 09/18 – 06/19, Co-investigator (0.01 FTE)

The overall objective of this supplement proposal is to quantify the public health impact of opioid prescribing policy changes on opioid overdoses and other complications to inform the design of treatment interventions.

Pregnant and Postpartum Women's Program

Hudson Foundation

\$5,000, 07/18 – 06/19, PI (0 FTE)

This pilot support will foster cooperation with community partners to provide childcare for women, empowering them to attend group therapy and MAT appointments.

Entacapone for Methamphetamine Abuse

MARC – NIDA / 5 P50 DA018165 08

\$50,000, 07/14 - 06/16, PI until 08/15, then Co-investigator (0 FTE)

This pilot study evaluated whether entacapone, via selective enhancement of cognitive control, mitigates the reinforcing properties of methamphetamine.
